

Competence in the topic "cutting" - ECOBRA introduces its assortment variety at the FachPack Fair

From safety cutters to cutting mats - ECOBRA from Oberasbach will show some perfected cutting tools at the FachPack which are really top and are ideal for daily use.

Everyone who works with cardboards and packaging will not be spared one thing – cutting. And for that, ECOBRA has the right tools and cutting utensils ready.

Regulation in the storage industry are the safety cutters with automatic blade retraction. ECOBRA offers various kinds of such cutters optionally with locking blades respectively with fixed adjustable blade feed so that the contents of the cartons will not be damaged. Of course these cutters are suitable for right and left hand use.

For the 9 and 18 mm cutters, the ECOBRA range offers low-priced types made of plastic and high-quality ones made of metal, respectively with metal blade guide and for even better blade stability with additional setscrew.

Of particular note, especially for warehousing is the foil / cardboard knife with its protected blade and easy handling.

ECOBRA leaves nothing to be desired for creative use as well. Special scalpel knives with different blade types for different applications are also available from ECOBRA like Roller-Cutters and Circle-Cutters for easily cutting circles.

Most of the cutters are already equipped with spare blades. Nevertheless, the replacement blades can be ordered for all cutters from ECOBRA – 4 qualities are available Premium Plus / Premium / Profi and Standard.

In order that the sharpness of the blades is maintained for a long time, ECOBRA offers cutting mats of various sizes as well – from standard quality to professional quality which are also suitable for machines cuttings, too.

It's worth it visiting ECOBRA at its booth during FachPack Fair hall 9 booth 233. The employees like to explain you the application of the products.
